1 CIE L*a*b* values are approximate and stated with UV included, according to ISO 5631-2:2015 guidelines. The color measurement methodology incorporates CIE standard illuminant D65 (simulated), 10° Standard Observer, and d/0° illumination/measurement geometry. Average CIE L*a*b* data are presented for relative paperboard shade comparisons—not as product specifications.

2 CIE L*a*b* values are approximate and in conformance with ISO 13655:2017. Data are specified according to the measurement condition M0, measured using an X-Rite eXact, configured to D50, 2° Standard Observer, 45/0 measurement geometry, with white (self) backing. Values may vary significantly when measured with different instruments. Average CIE L*a*b* data are presented for relative paperboard shade comparisons—not as product specifications. Paper white values specified according to the measurement condition M1 are available upon request.

All values listed are approximate and subject to change. Please visit *sappi.com* for the most up-to-date product specifications and available certifications.

1 CIE L*a*b* values are approximate and in conformance with ISO 13655:2017. Data are specified according to the measurement condition M0, measured using an X-Rite eXact, configured to D50, 2° Standard Observer, 45/0 measurement geometry, with white (self) backing. Values may vary significantly when measured with different instruments. Average CIE L*a*b* data are presented for relative paper shade comparisons—not as product specifications. Paper white values specified according to the measurement condition M1 are available upon request.

2 Guaranteed to meet US Postal Service 7-point minimum business-reply requirements.

3 Guaranteed to meet US Postal Service 9-point minimum business-reply requirements.

4 Matte Reply Card.

All values listed are approximate and subject to change. Please visit sappi.com for the most up-to-date product specifications and available certifications.

Visit *sappi.com* for the most up-to-date product information and specifications.

McCoy

Authentic brilliance in a world of imitation.

Like their customers, high-end brands expect a legacy of craftsmanship. Clear distinction is required. Compromise does not exist. Only meticulous quality will suffice—so only McCoy® will satisfy. It's the only premium coated paper on the market, meeting the detail-obsessed needs of high-end, luxury brands. Our paper is made with superior ingredients, including our own custom coating, to ensure best-in-class brightness and image integrity—crossing the threshold from ordinary to outstanding.

Luxury paper—realized

McCoy's supreme surface enables fully saturated films of ink to maintain superb detail, from shadow to highlight. Its unrivaled luminosity can expand the range of print and create bold contrast— allowing rich, vivid images to pop off the page. Offering a one-of-a-kind finish, McCoy creates an experience that lasts.

Perfection from its genesis

McCoy is rooted in our heritage of excellence, from the meticulous selection of wood types and fiber mix to the manufacturing of our own proprietary coating. It's this unyielding attention to detail that seals in McCoy's sophistication.

Uncompromising variability tolerance

We adhere to tight tolerances for variability to ensure that McCoy provides a consistent, stunning blue-white printing surface. So when you choose McCoy, your brand is printed on the highest-quality paper that exceeds the most demanding industry standards.

CERTIFICATIONS
SFI Certified Sourcing
FSC CoC certified[3]

All grades are acid-free and meet the permanence of paper criteria specified by ANSI/NISO Z39.48-1992 (R2009). Caliper is an approximation only and cannot be guaranteed except where indicated. Non-caliper guaranteed grades are manufactured to weight and finish. All grades are manufactured with virgin pulp produced with elemental chlorine-free (ECF) bleaching and recycled fiber consistent with EPA definitions, which is processed chlorine-free (PCF). Learn more about recycled fiber at *sappi.com/RF*.

1 McCoy Digital for HP Indigo only.

2 CIE L*a*b* values are approximate and in conformance with ISO 13655:2017. Data are specified according to the measurement condition M0, measured using an X-Rite eXact, configured to D50, 2° Standard Observer, 45/0 measurement geometry, with white (self) backing. Values may vary significantly when measured with different instruments. Average CIE L*a*b* data are presented for relative paper shade comparisons—not as product specifications. Paper white values specified according to the measurement condition M1 are available upon request.

3 All McCoy products are sold standard with SFI Certified Sourcing and FSC Chain-of-Custody (CoC) Mix Credit claims. Alternatively, customers may request either an SFI or PEFC CoC claim, based on availability of credits.

All values listed are approximate and subject to change. Please visit *sappi.com* for the most up-to-date product specifications and available certifications.

Spectro

The new standard in luxury that lasts.

For when what's inside really counts. Spectro® wows with a superior surface on both sides of the sheet. As a paperboard with enhanced optics, it's ideal for both packaging and commercial printing applications. Consider Spectro your invitation to stand out from the crowd.

Superior printability and surface, side to side

Spectro C1S and C2S deliver a uniform side-to-side smooth printing surface that features a proprietary coating engineered for brilliant color reproduction, sharper details, and better ink hold-out.

A breadth of applications

From direct mail to luxury goods packaging to point-of-sale materials, Spectro offers unrivaled versatility for both commercial print and packaging applications as you build your brand. Expect high-quality performance across numerous applications, including digital and folio sizes, all made and stocked in the US for quicker availability.

Consistent downstream performance

Spectro has the strength and durability to provide optimum convertibility for folding, die-cutting, gluing, and other converting applications. It's designed with exceptional dimensional stability, providing more flexibility in layout and downstream operations.

All grades are acid-free and manufactured with virgin pulp produced with elemental chlorine-free (ECF) bleaching.

1 CIE L*a*b* values are approximate and stated with UV included, according to ISO 5631-2:2015 guidelines. The color measurement methodology incorporates CIE standard illuminant D65 (simulated), 10° Standard Observer, and d/0° illumination/measurement geometry. Average CIE L*a*b* data are presented for relative paperboard shade comparisons—not as product specifications.

2 CIE L*a*b* values are approximate and in conformance with ISO 13655:2017. Data are specified according to the measurement condition M0, measured using an X-Rite eXact, configured to D50, 2° Standard Observer, 45/0 measurement geometry, with white (self) backing. Values may vary significantly when measured with different instruments. Average CIE L*a*b* data are presented for relative paperboard shade comparisons—not as product specifications. Paper white values specified according to the measurement condition M1 are available upon request.

3 Spectro is sold standard with SFI Certified Sourcing and either an FSC, SFI, or PEFC Chain-of-Custody (CoC) claim, based upon customer request and availability of credits.

Opus

The fine line between efficient and effective.

For when your campaign needs to perform everywhere.

We've engineered Opus® for maximum impact across an extended range of weights and finishes. The perfect balance of shade and brightness makes your brand jump off the page. Opus also has tighter tolerance standards than any of its competitors—and when your canvas is consistent, what you print stays consistent. Opus always delivers striking, reliable performance to meet the needs of any integrated marketing campaign.

One big happy family

Opus offers the broadest range of weights and finishes across sheet, web, and digital formats, including Opus PS—a solution optimized for direct mail—and Opus Digital and Opus Digital for HP Indigo, which are optimized to perform across digital printing platforms. With unrivaled versatility, Opus delivers the right impression at multiple touchpoints.

Striking the right balance

On one side of Opus, shade determines how evenly light reflects from a surface. A neutral shade provides a full, balanced gamut of light, which can come at the expense of crisp, intense color. On the other side, brightness gives vibrancy and pop, but this can come at the cost of shifting some pastels and warmer tones to a bluer shade. Opus perfectly balances the two, delivering a full range of dynamic color.

Confidence comes standard

Opus has the tightest tolerance standards of any premium paper in its category, delivering minimal variability within and across runs. Nothing else in the industry even comes close. Now *that* inspires confidence.

1 Matte Reply Card.
2 Guaranteed to meet US Postal Service 7-point minimum business-reply requirements.
3 Guaranteed to meet US Postal Service 9-point minimum business-reply requirements.
4 CIE L*a*b* values are approximate and in conformance with ISO 13655:2017. Data are specified according to the measurement condition M0, measured using an X-Rite eXact, configured to D50, 2° Standard Observer, 45/0 measurement geometry, with white (self) backing. Values may vary significantly when measured with different instruments. Average CIE L*a*b* data are presented for relative paper shade comparisons—not as product specifications. Paper white values specified according to the measurement condition M1 are available upon request.
5 All Opus sheet products are sold standard with SFI Certified Sourcing and FSC Chain-of-Custody (CoC) Mix Credit claims. Alternatively, customers may request either an SFI or PEFC CoC claim, based on availability of credits.
6 All Opus web products are sold standard with SFI Certified Sourcing and either an FSC, SFI, or PEFC Chain-of-Custody (CoC) claim, based upon customer request and availability of credits.

All values listed are approximate and subject to change. Please visit *sappi.com* for the most up-to-date product specifications and available certifications.

All grades are acid-free and meet the permanence of paper criteria specified by ANSI/NISO Z39.48-1992 (R2009). Caliper is an approximation only and cannot be guaranteed except where indicated. Non-caliper guaranteed grades are manufactured to weight and finish. All grades are manufactured with virgin pulp produced with elemental chlorine-free (ECF) bleaching and recycled fiber consistent with EPA definitions, which is processed chlorine-free (PCF). Learn more about recycled fiber at *sappi.com/RF*.

All grades are acid-free and meet the permanence of paper criteria specified by ANSI/NISO Z39.48-1992 (R2009). Caliper is an approximation only and cannot be guaranteed except where indicated. Non-caliper guaranteed grades are manufactured to weight and finish. All grades are manufactured with virgin pulp produced with elemental chlorine-free (ECF) bleaching and recycled fiber consistent with EPA definitions, which is processed chlorine-free (PCF). Learn more about recycled fiber at *sappi.com/RF.*

1 Opus sheets are sold standard with 10% recycled fiber. Opus web is available with 10% recycled fiber as a making item based on availability and applicable upcharges.

2 All Opus sheet products are sold standard with SFI Certified Sourcing and FSC Chain-of-Custody (CoC) Mix Credit claims. Alternatively, customers may request either an SFI or PEFC CoC claim, based on availability of credits.

All values listed are approximate and subject to change. Please visit *sappi.com* for the most up-to-date product specifications and available certifications.

Effective
03.23

88

The fine line between style and substance.

Beauty and strength, together in one powerful package that's perfect for publishers, direct mailers, catalogers, and printers alike. At Somerset, our one-of-a-kind manufacturing process produces sturdy paper with a smooth surface that allows images to pop off the page. The strength of the product translates directly into remarkable on-press efficiency and a heftier, more substantial feel in the finished piece. With Somerset®, you always get stunning results that demand your audience's attention.

A new definition of powerful

Somerset is the only mill that combines papermaking, coating, and calendering into a single continuous process. This means a stronger paper with more bulk and fewer splices, which is critical to high-volume web printing. The process also creates a smoother surface that allows ink to stay higher up on the paper for superior hold-out and print gloss—delivering rich, arresting imagery and a completely immersive experience.

Peace of mind

Somerset paper is built to withstand the demands of our continuous 4,000-feet-per-minute manufacturing process without breaking, making it the perfect solution for high-intensity printing environments. Its incredible durability means fewer web breaks and less downtime, which also means less hassle and fewer surprise costs. And the Somerset Mill uses three machines—all capable of producing a high volume of multiple weights and finishes—helping to ensure your project comes in on time.

A difference you can feel

Somerset delivers a far more substantial feel when compared to similar basis weight papers. This is critical for publishers and direct mailers because it allows for a lighter weight while maintaining a powerful, tactile experience that your customers will want to keep in their hands longer.

The fine line between price and performance.

Greatness doesn't guarantee an unlimited budget.

That's why we've engineered Flo® to give you the quality you expect from Sappi paper at a price that makes it hard to resist. Flo's superior color balance helps your brand look its best under a variety of lighting conditions. And because Flo is a great match to most standard proofing media, what you see before you print is what you get in the final product. With Flo, you get an exceptional experience that fits within your cost structure.

Celebrated for so much more than price

Sappi is chosen for our quality ingredients, environmental responsibility, reliable on-press performance, and attention to the smallest of details. Flo brings you dynamic features at a practical price so you can meet the demands of your brand and your budget.

A natural beauty

Flo's superior print surface, balanced shade, and optimized brightness provide accurate color reproduction while enhancing vibrant, fully saturated colors. With Flo, skin tones look natural, images are true, and critical colors are spot-on—reflecting beautifully on your brand.

What you saw is what you'll see

Flo is engineered for consistency—both in surface uniformity and for optimal printed color stability. It's the printer's choice for accurately matching color proofs and ensuring that what you saw on press is what you'll see in the final piece. Your printed color becomes more predictable in any environment—whether on press, in the office, or outside in natural lighting conditions.

3 Guaranteed to meet US Postal Service 9-point minimum business-reply requirements.

4 CIE L*a*b* values are approximate and in conformance with ISO 13655:2017. Data are specified according to the measurement condition M0, measured using an X-Rite eXact, configured to D50, 2° Standard Observer, 45/0 measurement geometry, with white (self) backing. Values may vary significantly when measured with different instruments. Average CIE L*a*b* data are presented for relative paper shade comparisons—not as product specifications. Paper white values specified according to the measurement condition M1 are available upon request.

2 Flo sheets are sold standard with 10% recycled fiber. Flo web is available with 10% recycled fiber as a making item based on availability and applicable upcharges.

3 All Flo products are sold standard with SFI Certified Sourcing and either an FSC, SFI, or PEFC Chain-of-Custody (CoC) claim, based upon customer request and availability of credits.

All values listed are approximate and subject to change. Please visit *sappi.com* for the most up-to-date product specifications and available certifications.

EuroArt

The fine line between reliable and remarkable.

When you need a dream on the surface and dependability on press. EuroArt Plus® is a smart choice for impressive performance. Engineered to provide exceptional on-press efficiency and reliable runnability, it has the brightness, shade, and ultrasmooth surface to ensure that color pops right off the page and delivers an incredible visual experience.

Postal guaranteed

EuroArt Plus 7pt and 9pt guaranteed calipers on covers are ideal for printing direct mail pieces and brochures that make a big impact while remaining cost-effective.

Style that excites

EuroArt Plus presents a sophisticated blue-white shade and high brightness. This print surface facilitates phenomenal image fidelity and superior color vibrancy that get messaging noticed.

A workhorse with versatility

EuroArt Plus, which features fast ink-drying times and outstanding folding performance, is HP Indigo certified and suitable for many other dry-toner digital printing presses. It's FSC certified and available in gloss and silk finishes to meet the needs of any job.

All grades are acid-free and manufactured with virgin pulp produced with elemental chlorine-free (ECF) bleaching. Caliper is an approximation only and cannot be guaranteed except where indicated. Non-caliper guaranteed grades are manufactured to weight and finish.

1 Guaranteed to meet US Postal Service 7-point minimum business-reply requirements.

2 Guaranteed to meet US Postal Service 9-point minimum business-reply requirements.

3 CIE L*a*b* values are approximate and in conformance with ISO 13655:2017. Data are specified according to the measurement condition M0, measured using an X-Rite eXact, configured to D50, 2° Standard Observer, 45/0 measurement geometry, with white (self) backing. Values may vary significantly when measured with different instruments. Average CIE L*a*b* data are presented for relative paper shade comparisons—not as product specifications. Paper white values specified according to the measurement condition M1 are available upon request.

4 All EuroArt Plus sheet products are sold standard with FSC Chain-of-Custody (CoC) Mix Credit claims. Alternatively, customers may request a PEFC CoC claim, based on availability of credits.

All values listed are approximate and subject to change. Please visit *sappi.com* for the most up-to-date product specifications and available certifications.

Mill certifications and recycling efforts

Sappi approaches paper holistically, using renewable energy and resources to create a recyclable and sustainable product. We use third-party forestry certification programs to ensure that our wood and pulp suppliers are adhering to responsible forestry practices—helping paper to continue to be one of the most sustainable mediums for communication. All of Sappi North America's US-based coated paper and packaging mills are triple certified in accordance with the leading global sustainable forestry chain of custody certification systems, including the Sustainable Forestry Initiative® (SFI) program, the Programme for the Endorsement of Forest Certification™ (PEFC), and the Forest Stewardship Council® (FSC-C014955).

Product certifications are available upon request. Please visit *sappi.com* or email samplesNA@sappi.com for the most up-to-date product specifications and available certifications.

Sustainable Forestry Initiative (SFI®)

The SFI program is based on the premise that responsible environmental behavior and sound business decisions can coexist. SFI program participants practice sustainable forestry on all lands they manage and influence millions of additional acres through the training of loggers and foresters in best management practices and landowner outreach programs. The SFI Forest Management Standard is internationally endorsed by PEFC.

Programme for the Endorsement of Forest Certification (PEFC™)

PEFC is a global nonprofit, nongovernmental organization that works throughout the entire forest supply chain to promote good practices in the forest and to ensure forests are harvested and managed using the highest ecological, social, and ethical standards.

Forest Stewardship Council (FSC®)

FSC is a global nonprofit entity that supports environmentally appropriate, socially beneficial, and economically viable management of the world's forests. FSC independently tracks, traces, and identifies wood fibers from the forest through every step of the procurement, manufacturing, and printing process, confirming that each supplier in the chain follows rigorous controls, management, and reporting practices.

Recycling Logo

Using a recycle logo reminds consumers that recycling paper is an easy way to reduce their environmental impact across the life cycle of printed materials.

Need inspiration? We have created a library of unique and fun recycling logos, free for anyone to use. To download high-resolution versions, visit us at *sappi.com/recycling-logo-library.*

Sappi e-commerce

A customer portal delivering seamless access to information, at your fingertips 24/7. Track the status of your orders, view all open orders, and bookmark the important ones.

- Check inventory in real time.
- View production schedules, including closed mill runs.
- Access your order-related documents (order confirmations, weight lists, invoices, etc.).
- Submit transit claims and returns.
- Use a variety of paper and paperboard calculators.
- Show the environmental impact of a print job with the eQ Calculator.

The Fine Line of Sappi Papers

Our products

We engineer our products to meet specific user needs, but there are several attributes you'll get from every piece of Sappi paper:

- Superior quality
- High-grade fiber
- Smooth printing surface
- Consistent press performance
- Dependability in the toughest printing environments
- Superior ink hold-out for full color intensity
- Uniform color reproduction
- Side-to-side consistency
- Tight variability tolerances
- Manufactured in the USA (McCoy, Spectro, Opus, Somerset, and Flo)

Sustainability

When you commit to a print campaign, you should be confident in your paper company's approach to sustainability. That's why we take a holistic view of our environmental responsibilities— from harvest through manufacturing, distribution, end use, and disposal. From beginning to end, we infuse environmental and social responsibility into our paper, processes and people, in order to give you one less thing to worry about.

For product-specific environmental information, go to *sappi.com/coc-options*.

Pioneering research and innovation

At Sappi, our passion for paper can be traced back over 165 years and is what guides us today. Our history of industry firsts includes the first paper coated and calendered on two sides, the first dull-coated paper, and the first mill-branded paper. Our innovative spirit is also demonstrated in initiatives like *Sappi etc.* and *Ideas that Matter*, which provide thought leadership for the entire paper industry.

Best-in-class service

We go way beyond technical specifications to help you choose the right paper for your brand and campaign needs. And once you're on press, our trusted printer technical support team stands ready to make sure your project turns out just right.
