

# Sustainability Highlights

Sappi is a diversified global woodfiber company unlocking the power of renewable resources to make every day more sustainable. We focus on dissolving pulp; graphic, packaging, and speciality papers; and biomaterials.

## Planet

### 2021 SNA total energy

**Over 80%** of our energy is generated from renewable or alternative fuels. Our 2025 goal is to decrease specific total energy (GJ/mt) by 5% from a 2019 baseline. Our total on-site renewable energy use is 70.5% with an additional 10.1% of renewable and clean energy as part of our purchased power for a total of 80.6%.

### 2021 total responsible fiber sourcing and fiber certification

**One hundred percent** of our wood, chips, and pulp is third-party verified as originating from controlled and noncontroversial sources.

### GHG emissions (kg CO<sub>2</sub>e/mt)

SNA has **one of the lowest carbon footprints** in the industry. The year-end results are significantly ahead of both the annual target (1% reduction) and the five-year target (5% reduction).

## Prosperity

- Sappi Limited became a signatory to the UN Global Compact in 2008. We have committed to the Science Based Targets initiative, and we are focusing on seven UNSDG goals where we can make the greatest impact.
- From 2010 to 2021, we made strategic investments of more than \$650 million in assets to ensure that our customers receive the highest-quality products in the most sustainable manner. We've also invested over \$126 million in R&D.
- In 2021, we celebrated our 13th consecutive year as an EPA SmartWay® Transport Partner, using transport carriers that leverage technology to minimize our collective carbon footprint.

- In 2021, our Cloquet Mill achieved a score of 84% on the Sustainable Apparel Coalition's (SAC) Higg Facility Environmental Module verification.

- In 2021, EcoVadis recognized SNA as a Platinum-rated company, putting us in the top 1% of pulp and paper companies assessed.

- Sappi North America has been named a 2021 SEAL Sustainable Product Award winner for its Ultracast Viva® casting and release paper.

## People

### Commitment to our employees

- Sappi is committed to representing the diversity of the communities it serves, including in leadership positions.
- **Over 50% of our North American executive leadership team is female.**
- Nearly half of Sappi Limited's independent public board members are either women or from ethnically diverse backgrounds.

*Our emergence from the pandemic the past year brought new challenges for our employees, communities, and customers. I am extremely proud of how our employees and industry partners weathered these unforeseen challenges to deliver positive and sustainable business results. Our continued focus on employee safety and strong supplier and customer partnerships helped us navigate these difficult times and remain a strong sustainability business. Our unwavering commitment to sustainability drives our thinking, provides competitive advantage, and motivates us toward delivering our purpose to help build a thriving world.”*

**Mike Haws**  
President and CEO

## Unforeseen challenges. Unwavering commitment.

### Decarbonization and partnership for transparency

Sappi has signed a letter of commitment to join the Science Based Targets initiative, which requires companies to set and meet GHG emission reduction targets for 2030 and 2050. This goal is to keep the global temperature increase well below 2°C compared with preindustrial temperatures. We have also expanded our carbon reporting to include Scope 3 emissions, seeking input from our suppliers so that we can develop reduction strategies for these emissions. This substantial effort will require full supply chain transparency, and we look forward to the enhanced partnership this will drive.

### Keeping forests as forests

We act as champions for sustainable forestry—working to keep forestland forested for generations to come. Taking an active role in management can improve the health and wellbeing of the forest by mitigating conditions that make the forest more susceptible to damage from fire, insects, or disease. We begin by partnering with landowners to create a healthy plan for growth, harvest, and regeneration so they can reinvest in their forests instead of selling their land for agriculture or business development.

### Ideas that Matter

Since 1999, Sappi's Ideas that Matter program has granted nearly \$14 million to support a wide range of initiatives that have a direct impact on social causes, ranging from sustainable food systems to healthcare to climate change. The program has been expanded to employees in North America, providing direct funding to nonprofit organizations that Sappi employees are most passionate about.
